ABOUT ME

Hi! My name is Polina Kozlova, I am a designer with experience in 3D, specializing in identity, event design, and printed materials. I have been working in design for a long time, exploring different fields, and I can't imagine my life without creativity. My portfolio includes projects where I worked extensively with spatial design and diverse concepts. I love to experiment, learn quickly, and always strive to deliver projects that don't require revisions :) At the same time, I understand that mistakes are part of the process — progress is impossible without them. I am constantly developing my skills and exploring new directions.

EDUCATION AND COURSES

Print Designer, Logomashina	2025 - Present
AI Tools Intensive, Brand *design WELLnESS	2025
Profession graphic designer from scratch to Pro, Contented design school	2023 - Present
Figma, Yudaev school, Branding	2023
Marathon "Blender" and course "Wagon", Kaino university , 3D modeling	2022
Interior ArchViz: Create Surreal 3D Designs with Camille Boldt , 3D modeling	2021
Blender 2.0, Kaino university , 3D modeling	2021
Boarding school and College " Art Center for Gifted Children of the North " Designer, teacher	2018 - 2022

EXPERIENCE

Freelance (logo, KV, identity, and 3D design) March 2022 – Present
DUXGroup Event designer(Middle) May 2023 - July 2025
EM Holding Euromebel - Designer-consultant October 2022 - February 2023
Art Center for Gifted Children of the North January 2022 - June 2022
Reklamgroup, Graphic designer May 2020 - July 2020

SOFTWARES

MERCH

Merchandise for International Conferences

For each conference, the merchandise was developed from scratch — both the selection of items and the concept were aligned with the overall idea and visual style of the stand. The only input data provided were the brand logo and corporate colors from the brand book, which allowed me to create unique solutions within a consistent identity. The process included all stages: brainstorming ideas, developing sketches, making revisions, approving designs, and preparing for print. Each merchandise pack complemented the stand and helped create a complete brand experience for conference visitors.

3D STANDS

3D Visualization of Stands for International Conferences

Development of 3D stands for international conferences. Some projects I completed independently, while others were created in collaboration with a colleague. The timelines were often very tight, which required generating multiple design options quickly, making edits on the fly, and maintaining constant communication with managers. As a result, the stands were successfully implemented at international exhibitions and conferences — in Brazil, Malta, and cities such as Dubai, London, Yerevan, Amsterdam, and many more.

3D STANDS

Event, Stand, and Merchandise Implementation

Work on stands covered the entire cycle — from design and construction to coordinating with contractors. At times, it was necessary to quickly replace or adjust elements due to the specific conditions of the venue, find alternative solutions, and rapidly approve changes. The most rewarding part was seeing the project evolve from the initial idea to its full realization.

SMM

Social Media Posts and Banners for Chilli Partners, WakeApp, Nine Casino

Development of social media posts and banners tailored to each brand's unique style. The work focused on adapting visuals to different formats and purposes: promotional campaigns, holiday events, informational posts, and event announcements. The final designs supported a cohesive visual style and helped brands stand out effectively among competitors.

FAVORITE PROJECTS

AI Velocity Event Concept

This project was created as part of the Contented course and represents the identity of an event dedicated to AI-powered racing. A full brand identity was developed, including merchandise mockups, digital and outdoor visuals (website and venue design), as well as the overall style and atmosphere of the event with interactive zones and augmented reality elements.

FAVORITE PROJECTS

3D Graphics and Animation for MTS 30th Anniversary Website

A real case for MTS: the goal was to create 3D graphics and animations for the company's 30th anniversary website. The work began with the development of metaballs, controls, and wires in accordance with the brand book. Numerous variations were created, both animated and static. Finally, adapted versions of the chosen 3D composition were prepared for both desktop and mobile versions of the site.

FAVORITE PROJECTS

Chilli Partners Stand and Merchandise for MAC Conf 2024

In 2024, a stand and merchandise project was developed and visualized for MAC Conf in Dubai. The concept was built around the theme of aviation and airlines. The process included several key stages: research and concept development, sketching and 3D visualization, followed by approvals and final refinements. The result was a cohesive project with a bright and recognizable visual identity.
